FEW TIPS...

- Focus on course work.
- Study lot of discrete maths, linear algebra, algorithms & some machine learning
- Do a lot of programming competitions
- Try to master at least two programming languages, preferably one very low level language like C, one relatively high level language like Python, and get familiar with non-imperative paradigms of programming. More the merrier.
- Use Linux, and learn to use shell effectively
- Understand how internet works, learn a few basic web development technologies & using them design your own home page
